# 3 – Messaging style

- On desktop:
  - Capitalisation and correct grammar but little usage of punctuation
  - Moderate use of shorthand/slang [\[see Extra notes\]](#)
  - Will use more punctuation when angry
- On mobile:
  - Questionable capitalisation and grammar, almost no punctuation
  - Large amounts of slang

4 – General availability list

Ping to find out

# Extra notes

- 2/Education:
  - This is somewhat general and based on US standards (1E = standard high school course on most basic level)
  - My programming knowledge extends to approximately USACO Silver/LeetCode ~2400, I have no CodeForces
  - Currently shadow banned from LeetCode
- 3/Messaging style:
  - Shorthand and slang refers to general abbreviations of common phrases
  - Ex: “idk”, “lmfao”, “sy(b)(g)au”, “lowk(ey)”

# Credits

- Microsoft PowerPoint and Office
- Freepik (thumbs up emoji)
- Computer Modern and Donald Knuth (font)
- Lenovo (sold computer I am working on)
- Intel (chipset and GPU)
- My ISP (internet)
- Etc...
